

## Company Policy

# Environmental Policy

WEMCo was formed in April 2009 when the Directors saw an opportunity in the West Country to establish a company with the experience and technical knowledge in high quality building services maintenance and facilities management.

This policy supports WEMCo's Sustainability and Procurement policies and describes our responsibility towards the environment. It is our intent to effectively manage and improve our environmental performance and minimize the impacts of our business on the environment. We are committed to do this through the following:

Driving continual environmental improvement by:

1. Ensuring effective management of our environmental impacts by implementing and adhering to ISO 14001 Environmental Management Systems standard.
2. Developing objectives, supported by targets, to manage potentially significant environmental aspects.
3. Protection of the environment, including prevention of pollution and other specific commitments(s) relevant to the context of the organisation.
4. Developing meaningful performance indicators to measure resource use, waste and emissions demonstrate efficient use of resources and as well as promote environmental best practice.
5. Using resources wisely by reducing resource use and reusing or recycling materials wherever possible.
6. Minimising water use in our buildings and services.
7. Complying with applicable environmental legislation and standards and other requirements associated with the industry sectors in which we operate.
8. Training of staff to enhance awareness of relevant environmental matters.
9. Periodically reviewing the environmental issues at the highest level within the organisation.
10. Working in partnership with our customers and supply chain to promote best practice environmental management techniques to deliver high-quality products and services.

### Policy Review

This policy has immediate effect and replaces all previous versions. This policy will be reviewed and amended on an annual basis.
